T Commentary: [Presently, Hurricane classification only ⁽²⁾ tabulates wind speed. It doesn't tabulate size (girth) and Flooding (surge into populated areas; rain). I propose that an A, B, C, D, E designation be created to account for these severities.] Helene dropped thousands of gallons of rain - far inland.

CORE. Class Chris Fairbanks

Addressed ^{that} how many prisoners are in a near continual state of fight/flight or fawn/freeze (^{both are} opposite of a state of peaceful existence, which I've mostly maintained in my near 9 years down). When they're released, they're usually in a survival mode, which stresses them, making them prone to recidivism. [My "SOLID Excellence" proposal remedies this.] After class, Chris shared his vision of having 5 levels of therapeutic programming to give increasing (excellence/success).

Meeting with ~~for~~ SOLID co-founder, Zachary Martindale

Z gave me some great advice relating to the logistics of rolling out/introducing/gaining leadership acceptance/support for my "SOLID Excellence" approach. (He recommended I not use the SOLID name.) Suggested contacting B1, ^{& Green} 4 Captains; and Deputy Warden.
