1990 Letter of Endorsement of Sterling by Prof. R. Wayne Boss
(Still True) - Back When it was not Forbidden to Speak Well of Him
^{Prof.} by Sterling D. Allen, 228033, USCF; AHS 2-1035 (Max, Solitary)

Aug. 19, 2026

I received the enclosed recommendation letter from my dad today, by Prof. R. Wayne Boss of the Univ. of Colorado, Boulder, College of Business and Administration and Graduate School of Business Administration. This endorsement got me accepted to BYU's Master of Business Administration program. (I ended up doing something else.)

Brother Boss was one of my dad's counselors when my dad was the Stake President in Boulder, CO for The Church of Jesus Christ of Latter-day Saints. Highly professional.

In the 3rd ¶ where he talks about "the strength of a person's desire," I would say that my desire for this AMCE/r.c. (reportance clause of prophecy) is far on the extreme end of a bell curve to the good side.

The 4th ¶ predicts success in my present quest to bring a Global Transformation in fulfillment of Isa 66:8, & Zech 3:9 & 2 Chron. 7:14.

He could have written this today and it would still hold true. Very relevant. ¶ It's been so long since someone so credible has spoken well of me. Calls to mind my quote I had on my Free Energy News site. Fosters:

"He who is one step ahead is a genius; he who is two steps ahead is a coachpot."

Dear Sir:

The purpose of this letter is to provide you with my candid evaluation of Mr. Sterling D. Allan as a potential graduate student in your program.

I have never shared a classroom with Sterling, so I have no first hand observation of the quality of his academic work in that setting. However, I have reviewed a book-length manuscript which he wrote on the Book of Mormon. That manuscript is better written than most of the Ph.D. dissertations I have read. I have no questions about his ability to do research and to communicate in a written format.

Sterling comes from a very supportive family with strong educational values. His father is one of the top three people in the world in the field of time measurement; he is currently the head of the Time and Frequency Division of the National Institute of Standards and Technology in Boulder, Colorado. Sterling comes out of the same mold and shares the same drive and desire for education as his father. From my experience in working with graduate students for the past seventeen years, I have found the strength of a person's desire to be a major factor in his or her success.

Sterling is also a self-starter. He has a history of setting goals and then enthusiastically working to accomplish them. He has the initiative necessary to work independently, and from what I know about his record, the quality of the final product is consistently very high.

Sterling is a brilliant young man and has an unusual ability to conceptualize. He is highly articulate and expresses himself well, both in a public setting and on a one-to-one basis. He is also highly ambitious and extremely tenacious and self disciplined. Perhaps his strongest characteristic is that he knows how to work. I have no doubt about his ability to succeed in your program and to render service after graduation which would be a credit to BYU.

I have not seen Sterling's GMAT scores. Assuming they are acceptable, I can safely say that we would accept him to our Ph.D. program. Therefore, I strongly recommend that he be admitted to your graduate program.

Sincerely,

R. Wayne Boss
Professor
